PATIENT NAMES: _____

PERSONAL NO: _____

DATE OF BIRTH / AGE: _____

IDENTITY CARD NUMBER / PASS: _____

the above fields are filled in by the patient

SAMPLE COLLECTED ON: _____

SAMPLE TYPE: **naso- and oropharyngeal swabs**

NAME OF THE TEST DEVICE: **SA CYCLER-96 SACACE BIOTECHNOLOGIES**

TEST NAME: **COVID-19 PCR (SARS COV 2 RNA)**

RESULT: **NEGATIVE**

Methodology: SARS-CoV-2 detection by the polymerase chain reaction (PCR) is based on the amplification of specific regions of the virus. In the Real Time PCR assay the amplified products are detected via fluorescent dyes.

The **COVID-19 PCR (SARS COV 2 RNA)** test has a specificity of 100% and a sensitivity of 100% at viral loads above 500 copies / ml.

This **barcode** sticker authenticates the result and gives access rights to the laboratory server for online verification on:
